

MICROSCOPY WORKSHOP – IST AUSTRIA

19th – 22nd March 2019

Join our microscopy workshop at IST Austria and gain valuable insight into the latest innovations benefiting life science research:

THUNDER Imagers

THUNDER Imagers with Computational Clearing define a new class of instruments for high-speed, high-quality imaging of thick, 3-dimensional specimens. Fundamentally change the way you work when imaging model organisms, tissue sections, and 3D cell cultures like organoids.

SP8 FALCON

Fast fluorescence lifetime imaging for investigating living cell physiology and exploring live cell dynamics.

LIGHTNING

Upgrade to confocal super-resolution down to 120 nm. Maximize the information you extract and get in-depth answers to scientific questions with LIGHTNING.

Location

Institute of Science and Technology
Austria
Bioimaging Facility
Am Campus 1
3400 Klosterneuburg

Get firsthand experience with these cutting-edge solutions during our hands-on workshop sessions. Contact us:
