

Tissue Clearing Workshop

October 15 - 17

*In cooperation with the
ISTA Imaging & Optics facility*

In microscopy, optical clearing emerges as an essential technique to overcome the problem of opacity in biological tissue. In partnership with ISTA, ZEISS is organizing a workshop dedicated to the concept of Tissue Clearing.

The workshop includes both lectures and practical hands-on sessions, to perform tissue clearing and sample imaging yourself. It spans across three days (October 15 - 17) in which experts for ECI Clearing & Cubic Clearing will share their knowledge and expertise.

October 15 - 17, What to expect:

- Theoretical introduction to the concept of Tissue Clearing
- Talks on different Clearing techniques
- Extensive Hands-On in small groups (ECI & Cubic Clearing)
- Over the three days you will be guided through the process step-by-step
- Exchange with different experts on the topic
- Clearing Protocols
- Imaging of your data on Lightsheet-, Zoom-, and Confocal- Microscopes

Reserve your place here [→](#)

Places are limited, first come, first serve.
Members of the ISTA will not be charged with any costs.

Workshop Location

Institute of Science and Technology Austria
c/o Imaging & Optics Facility
Am Campus 1, A-3400 Klosterneuburg, Austria
